“You're right, I did lose a million dollars last year. I expect to lose a million dollars this year. I expect to lose a million dollars next year. You know, Mr. Thatcher, at the rate of a million dollars a year, I'll have to close this place in...60 years.”

## Letters of Comment

**Taral Wayne**

[*In my review of To Walk the Moon in BCSFAzine #445, I asked why Taral said that the “Mars Attacks” collectible cards were “...revived in an orgy of bad taste by '80s yuppies.”*]

I don't remember when, exactly, but in the 1980s some company reprinted the old Topps “Mars Attacks” set of cards. You could buy them all at once, in a package, and glory in the gaudy colours, exploding heads, and skeletons flourescing in death rays. I have a set myself. But I find it too gaudy, too reminiscent of 1930s pulp magazine covers. Nor are the events real...thank gawd. The “Civil War New” cards were real, on the other hand, and the paintings much more realistic. However, it was the “Mars Attacks” cards that were revived in the '80s, I suppose because people feel more attraction to the cheezier moments than the good.

Felicity Walker wrote:

“At the last BCSFA meeting, we realized that we’ve been spending too much on printing and mailing, and that it’s time to trim BCSFAzine down.”

Did we not decide to STOP printing BCSFAzine?

[*No. The idea was proposed, but not everyone agreed.*]

The tail is wagging the dog. I am as much a dead tree fetishist as the next fan but the print-and-mail folks are bleeding the club dry, so either stake those vampires or pump the price of the paper issues up to the true cost.

[*Kneed in the groin by vampire dogs!*]

[*Each month, we print thirty-five copies. We mail out or hand-deliver between twenty and thirty copies. An average of ten copies are sales: four go to paid subscribers, and half a dozen are me paying cover price each time I give a copy away.*]

*Five copies go to a local bookstore (see indicia) which sells them on consignment and returns the unsold copies to us.*

*[As for the rest of the print run, two go to our own archives, eight go to our regular contributors, an average of two per month go to editors who send us hard copies of their zines in trade, two go to Library and Archives Canada (legally required), one goes to a professional writer/friend of the club, one to a local library with a zine section, and one to a local comic shop which displays our zine for its staff and customers to read. This leaves a handful of extra copies of each issue, which I carry with me whenever I go out, in case I can sell them.*

*[If, in the new year, we raised the cover price by a dollar—or 33%—we'd make ten dollars more per month, if we didn't lose any subscribers. Should we do that? What does everyone think?*

*[As for "bleeding the club dry," this re-raises the eternal question, "What is the purpose of BCSFA?" We don't run VCON anymore, and local fans have plenty of options for meeting places (see "Calendar"). If we weren't printing BCSFAzine, what would we do with the money?]*

Dear Felicity:

I'm now two issues due, and while I've been further behind before, this isn't the kind of thing I like to do. So, it's catch-up time, and here are some comments on *BCSFazine* 445 and 446.

445...More and more, with conflicting formats, more kinds of readers and less to read, and less disposable income being gradually taxed away, authors are tightening their belts, perhaps more than the average over-burdened consumer. It's getting tougher for anyone to make a living.

I did not hear anything about how the steampunk exhibition in Victoria went. Any half-whispered rumours or anything?

*[Nothing received yet.]*

High tea at the Empress should be enjoyed at least once. I can now tell you that there are plans for the Canadian National Steampunk Exhibition, to be staged somewhere in Toronto April 29 to May 1, 2011. More details as they arrive.

John Purcell's letter...actually, when it came to DUFF, I nominated John Purcell, and Yvonne nominated Jeff Boman. Both approached us at about the same time for a nomination, so rather than choose, we decided to choose both. Thanks to Fruvous, and for praise like that, the cheque's in the mail.

The calendar...today, I finished off my demodisk for potential voicework with a local agency, so with some luck, you may soon be able to list me as a voice actor in the calendar as well. I am hoping for my first pro audition soon.

*[If only I still did that part of the calendar! I've been wanting to take voice acting lessons for ages. Any advice—where to start; things to avoid?]*

*The Secret of NIMH* remains one of my favourite animated movies of all time because of the quality of animation, and in many ways put the name Don Bluth above the name Walt Disney in my books. I haven't seen much Bluth animation since, but *NIMH* was great. I don't have it on DVD...perhaps I should fix that. I know there was a terrible, musical sequel that we shall not speak of here...

Yvonne and I also pass along our condolences to Spider Robinson on Jeanne's passing. Spider, you are never alone, you have too many friends for that to ever happen. I hope that can be some comfort.

446...I did read the Calendar in each issue, but as you say, it's a lot of time spent on research. I used to do my quarterly convention lists, but I don't really do that any more. Perhaps less detail, less research, and lots of input from others will reduce your own workload.

*[Thank goodness for Keith Lim!]*

I have no particular love for BP, but I can't help feel that the constant negative spotlight on BP from the White House, the press and more are making the job that much more difficult. Lay off them, and let them make the repairs they need to make, and the massive clean-up that must come afterwards.

*[Unfortunately, corporations have a tendency to only do the right thing when the spotlight is on them. To put it more charitably, the price of a bad public image is the only argument the company's officers have to justify the price of doing the right thing when angry shareholders demand that everything possible be done to maximize profit. Not to single out corporations; politicians are just as bad unless they're kept in the spotlight too. And neither BP nor the White House looked like they were taking the blowout seriously.]*

*[BP seemed to be taking its time and trying the cheapest solutions first, while President Obama took personal responsibility for the disaster, then promptly dropped the ball. He must have thought the President's job was to reassure the people that their leader was on top of things, and having said so, he could relax. I want him to succeed, but to do that, he has to follow through.]*

*[As I write this, the well has been stabilized for a week. Meanwhile, eleven people are dead, oil is still floating around underwater, the food chain is contaminated, the ocean floor could explode in a huge storm of methane—and who knows how many more substandard rigs are out there that passed their last ~~Minerals Management Service~~ Bureau of Ocean Energy Management, Regulation and Enforcement inspection?*

*[I'm especially looking forward to reading the reactions of two faneditors to this topic: Opuntia's Dale Speirs, who knows about oil, and Challenger's Guy Lillian, a longtime resident of Louisiana.]*

Anybody here get to the Westercon?

*[Not as far as I know.]*

I've been hearing that there is a move afoot to end the Westercons at № 65 in a couple of years. The original idea behind the Westercons was to have a regular convention in areas that didn't have any cons at all. I imagine the same went for the DeepSouthCons, too. Now, many cities have not just SF cons, but cons for many associated interests. Has Westercon run its course? The western SMOFs may make that decision soon. And today is the first day of Gatecon...perhaps a report in the next issue?

[*Nothing received yet. Active, aren't we?—But seriously, I just haven't heard from anyone. I need to canvass for more reports. Anyone want to help with that? Amos? As for Gatecon, it's an expensive convention—I couldn't afford to go even when it was held here in Richmond. Imagine paying for parking and a room, too!*]

Sunday is the one-day steampunk con, and I definitely want to hear about that.

I think I'm going to call this one done; it's Friday, and I still need to go to work this evening. Sucks to be me...oh, well, at least I am partially employed. Felicity, I wish you a fantastic weekend, try to stay cool (we've just gone through four days of nearly unbearable heat and humidity), and we'll see you again with issue 447.

[*Hey, fancy seeing you here! Thanks again, Lloyd.*]

Yours,

Lloyd Penney

Hi,

First let me explain (??). I'm as confused as you may be with this explanation. In my to-respond bag of zines I have two *BCSFazines*—one is December 2009 and one June 2010. Without access to the poor old limping laptop's records—no idea what other LOCs (any?) I've written. There may also be other issues hiding around the house—I admit I'm not organized!

(I also notice that the June '10 feels pretty hefty!)

[*We're working on that.*]

Aww—see Little Lulu—wonder how many readers remember her?!

[*Surprisingly, my first encounter with her was through Harmony Gold's English dub of the 1976 Little Lulu anime. I think it was on the Knowledge Network.*]

Wow—both issues have covers by the prolific Brad Foster—keep 'em coming.

[*Done!*]

I second the appreciation of the calendar *and* fillos—lots of work—lots of thanks!

Congratulations (condolences?) to Keith Lim on his Chairmanship for VCON 36.

Fare-well Jeanne—warm thoughts Spider.

Kthhnd...a C-section??

By the time you get this the Hugo voting deadline will be passed. I hope all readers who were eligible to vote did. I took a deep breath and, once again, coughed up the money for a supporting membership—with the site vote. I also got a chance to read all the short story nominations (and saw most of the dramatic categories nominations)—so I actually voted in several categories beyond the fan categories. It is rare that the outcomes align with my choices but I did my fan-nish “duty” and voted.

The NASFiC will be held in a week or so—wonder how it will fare (with the economy being what it is). Time will tell.

Looks as if computer typing is not going to be happening until I figure out a way...oh well...

Thanks for the issues!

Sheryl

Good to see my *Star Trek* Bullshit article in print. I'm always a little embarrassed when I read myself getting all ranty. But those are things that have been bugging me for a long time.

It was interesting reading Taral Wayne (no relation) sharing his thoughts about *The Dark Knight*. I agree that Christian Bale's Batman was not strong in that movie. I don't agree with him that the beginning of *Batman Begins* was a waste of time. I enjoyed everything in that movie up until the last 20 minutes or so, when the whole Ra's al Ghul/Scarecrow plot got going and it turned into a usual action flick.

And I definitely don't agree that Heath Ledger's Joker was not The Joker. Granted, he didn't have a lot of jester- or playing-card-themed toys. But I think the basic core of the Joker was there, the sociopathic genius whose incredible rage against the world drives him to commit horrible, twisted acts that on some level he feels throws society's hypocrisy and corruption back in its face.

He might not have the gadgets, but he has the attitude.

[*What, no Surfing Ability Transferometer?! Where's Joel Schumacher when you need him?*]

I guess that's it for this issue. Sad to see the ol' zine stripped down, but I understand, agree with, and support the decision.

And hey, as long as I'm still in it, I guess everything's OK, right? :-P

## SF Information for Your Readers

Hi Felicity,

I'm starting a new series of Internet fiction and thought your SF fans might be interested. Here's the press release:

“*Birth of an Alien Nation*, a sneak preview of Sue Lange's upcoming Internet fiction, *Alien in the Land of Bejesus*, is being made available free of charge at her Singularity Watch blog (<http://suelange.wordpress.com/2010/06/24/birth-of-an-alien-nation/>). *Alien in the Land of Bejesus* is scheduled for publication in the fall, but in the meantime, episodes will be made available for free at the blog.

“The Singularity Watch blog focuses on the convergence of technology and culture. As such it is the perfect venue for the *Alien in the Land of Bejesus* where the alien is consistently caught up in technology. All stories in the series are designed for Internet and mobile reading: short and often humorous.

“Other of Lange's online work can be found at Book View Café. Her ebooks (*Uncategorized* and *We, Robots*) can be found in the Kindle store. Her print novels, *Tricheon Hash* (2003, Metropolis Ink) and *We, Robots* (2007, Aqueduct Press) are available from Amazon. Visit her website at <http://www.suelangetheauthor.com>.”

### Notes from July BCSFA Meeting

In attendance were Ray Seredin (host), Kathleen Moore (treasurer), Felicity Walker (editor), Doug Finnerty, Joe Devoy, and Julian Castle.

According to Ray, there is a chance *Doctor Who* (25%) and *Torchwood* (75%) will soon be filmed in Vancouver. The answer will be announced at Comic Con International. John Barrowman (star of *Torchwood*) likes Vancouver, including its skiing.

Also, Ray said that Seattle won the bid for Westercon in 2012. The venue will be the same as Norwescon, the Seatac Doubletree Hotel.

Doug told of an Alberta man with the unusual name Travis Vader, who's wanted for torching old people's motor homes.

For the upcoming *Zombie Walk*, Ray suggested victims dress as *Star Trek* "red-shirts." Felicity said that the *First Contact* Borg were also zombie-like. Joe added that an *Enterprise* episode had zombie Vulcans. This reminded Doug of the *Star Wars* novel *Death Troopers*, which had zombie Stormtroopers on a Star Destroyer.

Ray said that he'd heard from Danielle Stephens that there will be something to honour the memory of Jeanne Robinson at the next VCon.

Felicity noticed that video stores seem to be closing all over town. Kathleen replied that the public library is a good source of videos. There are also rental machines in stores like Safeway.

According to Ray, the Victoria CBC station has chosen to stay an affiliate rather than fully join the network so that it can still play its own programming, such as *Give Us This Day*.

### Comics News: Howard Chaykin, John Byrne, and Alan Moore

*Howard Chaykin*: The Hero Initiative issued a [press release](#) Thursday 5 August 2010 to announce that they have appointed Howard Chaykin and Walter Simonson to their Board of Directors to serve as members of the Disbursement Committee. The Hero Initiative is a not-for-profit fund, founded by a group of publishers, that supports in-need comics creators. Veteran writers, pencillers, inkers, colourists, and letterists

who have fallen on hard times due to medical expenses or unemployment can get helped from the industry to which they gave their talents.

From the press release: “ ‘Accepting Hero’s offer to serve was an easy decision, as I believe it’s incumbent upon all of us to do what we can to help those who came before us and laid the groundwork for the comics landscape today,’ Chaykin said. ‘None of us would be able to do what we do in this incredible and vibrant field without the efforts of comics’ elder statesmen, and it’s an honor to be able to do my part and do right by them.’ ”

Chaykin and Simonson are contemporaries who shared a studio, Upstart Associates, from the late 1970s to mid-1980s. According to Hero Initiative President Jim McLaughlin, they’ll be taking over the duties of the late Dick Giordano, who passed away last March.

Meanwhile, of course, Chaykin has also been making comics. I’ve been especially delighted by Chaykin’s artwork in *G.I. Joe: Hearts & Minds*, written by best-selling author Max Brooks (son of Mel Brooks). The series offers an inside look at the motivations and personalities—the hearts and minds—of various Joes and Cobras, one of each per issue, with the Cobra story illustrated by Chaykin. Seeing classic villains like Major Bludd and Firefly drawn by Chaykin has been a treat; I’ve never encountered the third issue’s Cobra—the Interrogator—before, but I won’t be able to forget him after reading his story.

Chaykin’s also providing art for *The Rawhide Kid* (possibly subtitled *The Tombstone Blues*, *The Sensational Seven*, or nothing at all, depending on whether you go by online comic databases, the comic’s cover, or the comic’s indicia), a new four-issue mini-series from Ron Zimmerman, the writer of 2003’s reimagining, *The Rawhide Kid: Slap Leather*. Zimmerman’s Rawhide is in good hands with Chaykin, who’s proven many times in his comics that he can do badass, glamorous, and historical all in one setting. Plus: Ghost Rider came!

*John Byrne:* Two sizzling items about British-Canadian-American comics creator/writer/artist John Byrne are making the rounds in comics fandom this week.

The first item is for real: publisher IDW has announced that the long-awaited continuation of *John Byrne’s Next Men* is finally happening! A superhero saga that launched as a four-part serial in *Dark Horse Presents* in the summer of 1991, *Next Men* (or *JBNM*, as Byrne preferred to abbreviate it) ran as a regular series for thirty issues before ending on a tantalizing cliffhanger. Byrne said at the time that the market could no longer support creator-owned comics, promised that the story would be continued when the industry recovered, and was next seen as writer/artist for a semi-rebooted *Wonder Woman* at DC.

Throughout the years Byrne had no news about the possibility of more *Next Men*. Lately, Byrne has been working steadily for IDW, producing *Star Trek* comics such as *Romulans* (*Alien Spotlight* and *Hollow Crown*), *Assignment: Earth* (starring Gary Seven), *Crew* (starring Number One), and *Leonard McCoy, Frontier Doctor*. IDW recently published trade paperback collections of the original *Next Men* series, and Editor-in-Chief Chris Ryall made the *Next Men* announcement on Saturday 24 July 2010 at the Comic Con International in San Diego.

The second item is more facetious: on Sunday 1 August 2010, Byrne, who is not a fan of *Watchmen*, Alan Moore, or deconstruction of superheroes in general, commented in the forums on his website, Byrne Robotics, that he thought Rob Liefeld would be the perfect candidate to write and draw a follow-up to *Watchmen*. Specifically, Byrne said:

“I was watching a few minutes of the *Watchmen* movie on cable last night, and I found myself musing on the notion of a ‘prequel’ or sequel to the original comicbook series.

“In *Watchmen*, Moore inverted—I might say perverted—pretty much everything the superhero genre is all about. He was not the first to do so, but *Watchmen* was the first time we got it all in such a concentrated dose. Largely, this seems to have happened because Moore is very much a one trick pony. The one trick works for him and his fans, so no problem there, I guess. But this got me to thinking about who would be a suitable candidate to produce another round of *Watchmen*.

“The thought began to take shape in my head that any revisiting of those characters should be a continuation of the ‘tradition’ of *Watchmen*. That is, as Moore trashed everything superheroes were all about, the next go-round should do the same with *Watchmen* itself. So the ideal candidate for doing the project should be someone who is equally a one trick pony, but from the opposite end of the spectrum. Immediately, one name sprang to the forefront: Rob Liefeld.

“No, I’m not kidding. Liefeld would be to *Watchmen* what Moore was to superheroes in general. And it would be such fun to watch a whole flock of retailers’ heads exploding, as they tried to serve two entirely different faces of mammon!”

It seems clear to me that, despite the previous paragraph, Byrne *is* kidding, at least in the sense that, while he may sincerely think *Watchmen* deserves Liefeld, he does not actually believe anyone would take his suggestion of a Rob Liefeld *Watchmen* seriously. However, half the comics blogosphere has reacted as if Byrne has completely lost his mind and is actually planning to get Rob Liefeld to write and draw *Watchmen 2*, which would be hilarious.

Maybe Byrne and Liefeld could collaborate on the comic adaptation of the *Watchmen* movie. Then Ty Templeton could draw *Watchmen Adventures*, which would adapt *Saturday Morning Watchmen*.

*Alan Moore:* On a related note, Alan Moore says that “comics are dead” and has bid “farewell to the comics industry.” In an interview with *Comic Heroes*, Moore said:

“I haven’t read a comic in years but I’ve not been tempted to. It looks like it’s stuck in the late ’80s and early 1990s and it’s just going to be an endless cycle of that material. So I tend to suspect that it was probably only me, and a number of my collaborators, who were actually interested in pushing things forward. I think that the publishers are happier with an unending stasis; I think a lot of the artists and writers are. I tended to

feel that, yes, I received a lot of admiration but I also received a lot of suspicion and antagonism that, frankly, I could do without.”

“So although I’ve had a great love of comics as a medium, I belatedly came to realise that the comics industry does not want progress. In fact, it isn’t capable of it and it doesn’t want it.”

And: “It looks to me as if the comic industry is pretty much already getting out of comics. The individual pamphlets don’t sell as much as the collections. The biggest circulating news I saw coming from DC Warner Brothers last year was that they’d sold the rights to use Superman for some sort of online gambling.

“This is basically the only thing the characters are worth now? They’re so debased that they’re only useful for franchises, that you can knock out a few more Batman films, a few more Superman films...once that dries up, then what will there be?”

After eight Jack Kirby Awards, eight Eagle Awards, seven Comic Buyers’ Guide Fan Awards, seven Harvey Awards, nine Will Eisner Awards, and one Hugo Award, he’s had enough antagonism. Thanks for the great comics, Alan!

## Dating Game

Taral Wayne

**Gadget:** “Mystery Date Number...um, Two—if you were to take me to dinner for a Special occasion, where would we go?”

**Mystery Date 2:** “Gee, I dunno...Maybe to Minkowski’s Deli? They got the bestest knishes. Or maybe Momma could make us some beet soup.”

**Gadget:** “Uh...I suppose. Number One—where would *you* take a girl to dinner?”

**Mystery Date 1:** “The same place I’d take you to dinner every night, P...I mean Miss. To a charming little vegetarian bistro, with a sensitive menu at *very* reasonable prices. Over an unpretentious but quality California vintage, tasty low-fat textured vegetable protein filet, and hi-fibre organically grown legumes, we would fill the table-cloth with our romantic calculations, finally diagramming the strategy whereby *I can take over your heart!!!*”

**Gadget:** “Golly...That sounds...(ugh) romantic. Number Three?”

**Mystery Date 3:** “How does Mars sound, Toots? We can pick *blueberries*. Or if you’d rather something more glamorous, there’s always Millirays at the End of the Universe. Literally *always*. But even if we stay at my pad, have a couple of Saurian Brandies and order-in Gaggh, it would be glamorous with *you*. Whaddya say, baby?”

**Gadget:** “You know, I think I’d just as soon eat at home with the guys.” (*To MC*) “Can I *throw* this game, or do I *have* to win one of them?”

## Movies: The Man Who Wrote ‘Battlefield: Earth’

Michael Bertrand

First of all, let’s talk *Battlefield: Earth*.

No wait, come back! Come on, it’s not so bad! It’s been long enough now, we can talk about it. Time has passed, wounds have had time to heal, the crater left by its meteoric box office crash (it’s the size of Texas, Mister President) has had time to cool from white hot to red.

And don’t worry, I’m going to be really bitchy and sarcastic about it to take the sting out.

See, thanks to the never-ending cornucopia that is Roger Ebert’s awesome Twitter, I recently came across this amazing, amusing, and astounding article by, I kid you not, the man who wrote the script for what is universally considered one of the worst movies in history.

In fact, if you factor in how much it cost to make, it *is* the worst movie in all history in terms of dollars per amount of suck.

Its Metacritic score is 9. Yes, that’s a single digit. Nine percent. In fact, in the list of Metacritic’s all-time low scoring movies, it’s number twenty-one, meaning that in Metacritic terms, there’s only twenty movies in all existence worse than it.

(Worst movie of all time? *Bio-Dome*, with Paulie Shore. Way to go, Paulie! You’re number one!)

So needless to say, the opportunity to read the above-linked article giving the real scoop about how he ended up writing one of history’s biggest flops was irresistible.

Turns out, the article is funny, the screenwriter was not, is not, and has never been a Scientologist, and on the big celebrity cruise ship, they walk about in robes and slippers, drink fine scotch, and smoke Cuban cigars. It’s like a cult invented by Hugh Hefner. Keen.

Oh, and unsurprisingly:

“My script was very, *very* different than what ended up on the screen. My screenplay was darker, grittier and had a very compelling story with rich characters. What my screenplay didn’t have was slow motion at every turn, Dutch tilts, campy dialogue, aliens in KISS boots, and everyone wearing Bob Marley wigs.”

I can only imagine that the first time he saw the finished movie at the premiere must have been a disturbingly surreal experience on a positively David Lynch Meets David Cronenberg and They Both Do a Lot of Bad Drugs Together level.

They fired him when he wouldn’t change the script how they wanted him to, so he’s entirely in the clear as far as responsibility for the resulting disaster is concerned. So he’s free to laugh at it with the rest of us, knowing he got paid a completely insane amount of money for a screenplay that looks nothing like what ended up on screen, and has a whopper of all Hollywood stories to boot.

Not freaking bad, sir.

### 'Doctor Who' News for August 2010

OK, if you've seen the *Doctor Who* episode "The Big Bang," please on keep reading. If not, please stop reading this and watch it before you do, because this article has a few spoilers.

OK, this will sound kind of odd to the handful of classic series fans who still don't like the post-2005 series that has the name *Doctor Who*, but here I go. "The Pandorica Opens" and "The Big Bang," to me, are two of the best *Doctor Who* episodes ever made.

What other series would have not one, but three main characters die, and a person from the main character's future—the one and only River Song—holding a book of spoilers that could have saved him a lot of trouble, like getting the TARDIS blown up in order to save the whole of time and the universe? Oh, and all those bizarre cracks in time that we saw throughout series five getting explained, all the series' evil-doers from the last forty-seven years joining together to trap their greatest enemy to use him to destroy time and space, and most of the major guest characters from this series in total panic at the start of this story?

So the Doctor escapes and travels through time via River's vortex manipulator, trying to save his friends and to set everything right. Then it comes down to the Doctor ramming the Pandorica into the exploding TARDIS, thus erasing all the adventures he and his friends had in the run of this series while rebooting the whole of time and space.

Then Amy wakes up from an odd dream to find herself in her family home on the date of her wedding to her long-time boyfriend Rory and even receives a blue book that used to be owned by River Song—then she really knows that someone's missing. So she remembers the Doctor and from nowhere a certain Type 40 TARDIS appears.

Then in the end they all get into that blue box, except for River (who went back to the future via her vortex manipulator), to find more adventures. Now this is *Doctor Who* story-telling at its best.

The other highlight of this series, to me, was "Vincent and the Doctor," one of six *Doctor Who* stories/episodes that made me cry (the others being "Survival," "Girl in the Fireplace," "Doomsday," "Journey's End," and "The Big Bang"). The story dealt with Vincent van Gogh, who painted a work that has a rather forbidding monster in the window of a church. After seeing this painting, the Doctor and Amy travel back to 1890 and befriend van Gogh, who is being blamed for a number of strange deaths around Arles (the town in France where van Gogh did over 300 of his works). Oh, one thing I better tell you now is that this monster can only be seen by van Gogh (though the Doctor can see it through a device he takes from the TARDIS). In the end, the painter saves the life of the Doctor, but is greatly saddened by the death of the beast, a Krafayis, who was abandoned on Earth when its species moved on, and was very lonely, much like van Gogh himself.

This story did something that no other sci-fi series ever did before: taking on bipolar disorder head-on, while nevertheless making it a fun story about this heart-breaking disease. Being a member of the mental health community, I know many people who are bi-polar, with even a few of them who, like van Gogh, took their own lives because of it. The BBC itself even has a link on the *Doctor Who* web-site to answer viewers' questions about the disorder.

The classic series always had a way of bringing the important issues of the times it was made in to a sci-fi setting, and now the new series is doing the same, this time bringing up a mental health issue that *Star Trek* never dealt with in all its reincarnations over the last 44 years.

So let's give a "Hear, hear" to the producers of *Doctor Who*.

As for the rest of the stories, they're the highs ("Time of the Angels"/"Flesh and Stone"), they're the lows ("The Vampires of Venice"), and they're the just plain fun ("The Lodger"). Over-all, another great season of *Doctor Who*.

As for the Eleventh Doctor, Matt Smith is just right for the role of the 907-year-old Time Lord. This regeneration is a little bit nutty, a bit over-cautious with the companions (who never listen to him in the first place), and has a strong liking for bow-ties. What else would we want in this kind of a Doctor? Besides, as we've seen in "The Lodger," the new Doctor is great at playing football (or soccer, as us North Americans call it).

By now you're asking, "Gee, Cosmic Ray, what's going to happen in the next series of *Doctor Who*?" Well, by the time you read this, the filming work on the 2010 Christmas special should be in the can, with production for the 2011 series getting underway in the first week of August. They are keeping a very tight lid on what's going to happen in the new series, but it looks like the Doctor will have two companions at the start, they will run into the mysterious Dr. River Song a few more times as we find out more about the future Doctor, and as you already know, Neil Gaiman is writing one of the episodes. The rest is mostly rumours for now, but if you watched the final episode of this series, you know that the TARDIS exploding reset the whole of time and space, so (pardon the pun) who knows? Maybe the Time Lords are back, maybe the two races of Daleks will be in a civil war with themselves, or maybe some other monster lost in the Time War will return to wage revenge on the Doctor. We just won't know until spring 2011.

The other big news coming from Britain is that the *Doctor Who* spin-off series *Torchwood* is going international. A deal with BBC Worldwide and the US premium cable network Starz will see ten new episodes of the series that will have one storyline that will take the Torchwood team around the world. Both John Barrowman and Eve Myles will return to their roles from the BBC series, but the new member of the team will be Americans (heck, put a Canadian in there and watch the Americans always lose to him or her in the hockey pool). The new series is to go into production in January, with its North American production locations a very closely guarded secret (Please pick Vancouver, please pick Vancouver!).

OK, before I go, what if you were riding on a ferry that was just about to enter Active Pass, when you noticed, out the window, the ferry overtaking a 10-meter-long, rather sturdy, American pleasure craft, with a blue (that looks somewhat close to London police-box blue) hull, with a wooden plate on its bridge bearing the name of a time-and-space-traveling police box belonging to a certain Doctor?

Before you make a note in your head to never watch *Doctor Who* again and purchase a copy of *Little House on the Prairie: The Complete Series* at the nearest Best Buy, I would like to tell you *you are not seeing things*. There's a craft named *TARDIS* based out of out Bellevue, Washington, and every so often she shows up in BC waters. With a name like that, she's almost certainly owned by some well-off series fan.

It's my hope that in 2011, when the real *USS Enterprise* shows up in Seattle, that some series fan who enlisted in the US Navy will get permission for *TARDIS* to come up close to the Big *E* and someone will get some pictures of it. I can see it now—photos on sci-fi sites everywhere on the web, with a caption above her reading "Think you're big? I'm even bigger on the inside."

So, back to watching classic *Doctor Who* episodes until December 26<sup>th</sup> (or whenever). 'Til then, be seeing you.

"Zines—The Joy of Text": Review of *BCSFazine*. Natalie MacLachlan liked the coloured paper; she did not like the lack of Australian events in "Calendar," my failure to state what she would get out of joining BCSFA, and worst of all, "Why You Got This," which again did not tell her why she should join. I could stop doing "Why You Got This"; it's hard to write anyway.
